

BEHAN KUMAR

Full-Stack Developer | Defence Tech Builder | Real-Time Systems

+91 8969015583 | behankrbth@outlook.com | Dera Bassi, Punjab | [LinkedIn](#) | [GitHub](#) | [pairly.chat](#)

PROFESSIONAL SUMMARY

Full-Stack Developer building production-grade systems independently. Currently developing BattleSight AI — a real-time battlefield awareness system for Indian Army infantry — submitted to iDEX Open Challenge 19 (In-Process). Shipped Pairly, a live real-time chat platform with users across India and international locations. Owns full product lifecycle from architecture to deployment.

PROJECTS

BattleSight AI | [Independent Defence Technology Project](#) | 2024 — Present

iDEX Open Challenge 19 | Ref: OP202506022543 | In-Process

- Built complete software system — command dashboard, real-time threat detection pipeline, Python sensor simulator, device management, session tracking, and audit logging using React, TypeScript, Node.js, Socket.IO, Redux Toolkit, and MongoDB
- Implemented RBAC with superadmin, commander, and analyst roles, httpOnly JWT auth, and complete operation audit logs

Pairly | [Real-Time Chat Platform](#) | 2024

[pairly.chat](#) | [github.com/behano5/pairly](#)

- Shipped production real-time chat app with sub-100ms Socket.IO latency, JWT auth, and 30% page load improvement — live with international users

Brandora | [Digital Agency Full-Stack App](#) | 2023

[brandora-agency.vercel.app](#)

- Full-stack agency platform with GSAP animations, Node.js/Express APIs, 25% load optimization — fully responsive and live

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, Redux Toolkit, Material UI, GSAP, Leaflet.js

Backend: Node.js, Express.js, REST APIs, Socket.IO, JWT, RBAC

Database: MongoDB, Mongoose, MongoDB Atlas

Tools: Git, GitHub, Postman, VS Code, Vercel, Render, AWS Basics

ACHIEVEMENTS

- iDEX Open Challenge 19 application submitted and In-Process (Ref: OP202506022543) — one of the few independent developers to apply to India's premier defence innovation challenge
- Shipped Pairly live with users across India and international locations — independently built and deployed
- Developing the only known independent indigenous wearable battlefield awareness system in India targeting under Rs. 1.5 lakh per unit vs US IVAS at Rs. 24 lakh

RESPONSIBILITIES

- Sole developer and architect — owned entire product lifecycle from ideation to deployment across frontend, backend, database, and real-time systems
- Managed all technical decisions independently including system architecture, API design, authentication, and production deployment
- Conducted independent research for iDEX defence proposal — documented complete hardware specifications and system architecture for Army evaluation
- Maintained and debugged production applications with live users across multiple geographies

EXPERIENCE

Full-Stack Developer | [Ducat School of AI, Noida](#) | Mar 2025 — Mar 2026

- Built 5+ production-style MERN and Next.js apps, 20+ REST APIs, JWT auth, RBAC, and Git workflows

EDUCATION

B.Tech Computer Science | [IKGPTU](#) | 2022 — 2025 | GPA: 7.59

Diploma in Computer Science | [HSBTE](#) | 2018 — 2021
